

## Children's Book Proceeds to Benefit INMED

Imagine how thrilled we were to learn that INMED is a beneficiary of the sales from a new children's book about the coronavirus pandemic. Titled *SoOoOoOo Much Toilet Paper!: A Kid's Guide to Surviving a Pandemic*, the book seeks to help children understand the current crisis and how it applies to them.

Coauthors Greta Davis, a medical student who works at a pediatric hospital, and Makenzi Jordan, a former nanny, have a passion for children and wanted their book to also benefit kids in need.

"Children's health and education are causes we both care deeply about," says Davis. "Instead of throwing a few dollars at a giant nonprofit, we wanted to target a smaller organization with a great structure and very clear passion behind the mission. For me, the #1 thing I believe in is capacity building, and I love to see inspiring ideas of organizations that are able to do that so well! INMED definitely met all these criteria!"

The book is available on Amazon and AmazonSmile (designate INMED Partnerships for

## Para Crianças Delivers COVID-19 Relief in Brazil

Mission accomplished...but there's so much more to do. Our Health in Action team has been working with municipal officials in Pombos, Pernambuco and Tucumã, **Pará** to address the needs of a growing number of children going hungry during the coronavirus lockdown.

Many children who rely on their schools for daily sustenance have not had regular meals since schools closed two months ago. Our team devised a plan to raise funds for food baskets and hygiene kits to help the families in most dire need.

Thanks to a grant from the Mondelēz International Foundation and a crowd-funding campaign by Programs Director Paula Sanches, our INMED Parcerias Para Crianças staff has distributed food and supplies to nearly 200 families. If you would like to help our team reach more children and families in need, please [CLICK HERE](#).

## Wesselsbron Co-op is Food Secure

*Farmers with disabilities tend their climate-resilient grow beds.*

*Heavy floods have ruined the co-op's traditionally farmed crops.*

Our INMED Aquaponics™ project for farmers with disabilities in Wesselsbron, Free State is producing a bumper crop of winter lettuce in record time. Our team at INMED South Africa delivered seeds and fish food just a day before the national lockdown, and it's a very good thing. Heavy rains have flooded the co-op's traditionally farmed crops, but their aquaponics

system is unaffected—providing food security during the pandemic.

## INMED in the News

**Parade Magazine** recognized INMED Partnerships for Children among the top nonprofits for COVID-19 relief charitable giving for our high rating on Charity Navigator, our emergency response program and global reach. Parade has a readership of 54.1 million people. **CLICK HERE** to read the article.
