For more than a decade, INMED Aquaponics® has provided food security, vocational skills development and sustainable livelihoods for vulnerable populations.
Accommodates people with disabilities, special needs and youth who do not adapt well to traditional classroom environments.
The INMED School at Paxton Campus

- A private school for middle-school and high-school students
- Aquaponics greenhouse
- General education curriculum + innovative curricula in
  - Sustainable agriculture
  - Health & nutrition
  - Business development
  - Marketing
  - Economics
  - Environmental science & horticulture
  - International studies

All INMED projects include environmental protection and preservation as a core objective. As a good neighbor, we will continue that commitment at Paxton by preserving the existing trees and vegetation boundaries to the fullest extent possible by incorporating permaculture principles.
The INMED School Site Plan
The INMEDI School at Paxton Campus

What is Permaculture?

A welcoming, sustainable ecosystem consisting of food forests, butterfly gardens, sensory habitats and nature trails that will invite exploration and enjoyment for the community.
