what you can do

make a donation

Your financial support allows us to provide life-changing, and often life-saving, services to more children in more communities. To make your tax-deductible donation today, call us at 703-729-4951 or visit us at www.inmed.org.

spread the word

Did you know that people are more likely to give when asked by someone they know? Tell others about INMED and encourage them to support our services. Call our office at 703-729-4951 if you would like material to share with others, or if you would like to arrange for a presentation for your friends, colleagues and/or club.

volunteer

INMED has a variety of volunteer opportunities available—from putting together information packets to mentoring a child in need. Call our office at 703-729-4951 or email us at contact@inmed.org to let us know what you are interested in doing.

our mission

INMED Partnerships for Children rescues children from the immediate and irreversible harm of disease, hunger, abuse, neglect or violence, and prepares them to shape a brighter future for themselves and the next generation.

our vision

We build a continuum of care from infancy to adulthood by engaging families and communities to build a foundation for the healthy development of their children. This support leads children along the path to a brighter future, enabling them to create hope and opportunity for generations to come.

what we do

Too many children around the world live in broken families and violent communities, and face poverty, poor health, malnutrition and lack of education—a generation of children is at risk.

Through a broad range of health, social, education, violence prevention and community development programs, INMED Partnerships for Children helps to create opportunities that inspire hope, build self-reliance and encourage community collaboration. We do this through partnerships that we have built in more than 100 countries, including Brazil, Jamaica, Peru, and South Africa, touching the lives of millions of children.

INMED develops its programs within three priority areas:

- Securing children’s health, development and safety
- Developing skills, knowledge and opportunities for children and youth
- Building family and community capacity to support and sustain positive change

program highlights

- More than 3 million children and their family members in Brazil and Peru have been treated with deworming medicines to combat potentially devastating intestinal parasitic infections.
- School and household gardens in South Africa and Brazil have brought food security to more than 235,000 impoverished children and their families.
- Maternity waiting homes are bringing late-stage pregnant women from remote villages in Peru’s Amazon jungle close to life-saving medical care.
- Children in Jamaica share important lessons about nutrition and healthy lifestyles with their peers and community through music and lyrics they compose themselves and perform on a national stage.

- Every primary public school teacher in Tobago has been trained in best practices in literacy instruction.
- Working poor families in Loudoun County, Virginia are being brought back from the brink of homelessness.
- Abused teen moms in Compton, California are learning job skills to gain financial independence and make a fresh start.
- In Compton, more than 200 children of incarcerated parents have been partnered with mentors who establish friendships, inspire confidence and lead by example.
